

# WASTE MANAGEMENT PLANS

## WASTE MANAGEMENT PLANS SERVICES

Our waste consultancy specialises in creating comprehensive Waste Management Plans that align with the client’s organisational sustainability goals. With in-depth knowledge of Australian waste regulations and industry best practices, our plans are tailored to address our client’s unique needs.

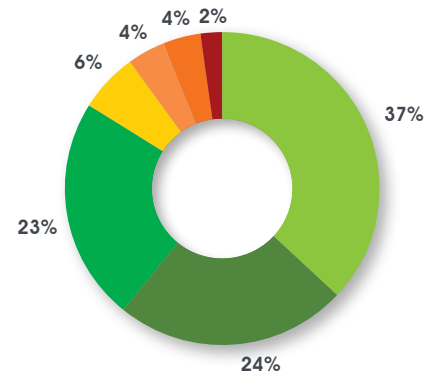

We have delivered plans for an array of developments including residential, commercial/retail, mixed-use, aged care facilities, hotels, childcare facilities, education works and more. Our approach integrates waste reduction, resource recovery and efficient disposal strategies to minimise environmental impact.

A breakdown of Waste Management Plans delivered across multiple developments.

- COMMERCIAL
- HOTELS
- AGED CARE FACILITIES
- RESIDENTIAL
- CHILDCARE FACILITIES
- EDUCATION WORKS
- MIXED USE

**250+ CLIENTS**  
Across Australia

**550+ WMP**  
Delivered

## WORKFLOW

## METHODOLOGY

- 

Desktop review – Review of all relevant documentation including State and Council policies and guidelines, development designs, on-site waste infrastructure and waste collection vehicle access.
- 

Waste Generation Modelling – Determine the projected waste generation and the associated bins required onsite, utilising Talis’ in house database of local government waste generation rates.
- 

Waste Storage and Collection Requirements – Identification of bin requirements, sizing, design and construction of bin storage areas and establishment of appropriate waste collection methods, in consultation with the local government and developer.
- 

Report – The report will contain the description of the Proposal, waste generation calculations, bin storage area layout figures, details of waste management measures, design features and collection methods that meet local government requirements.
